

PREMIUM LABELS

**FROM LARGE TO SMALL —
FROM ROLL TO LABEL**

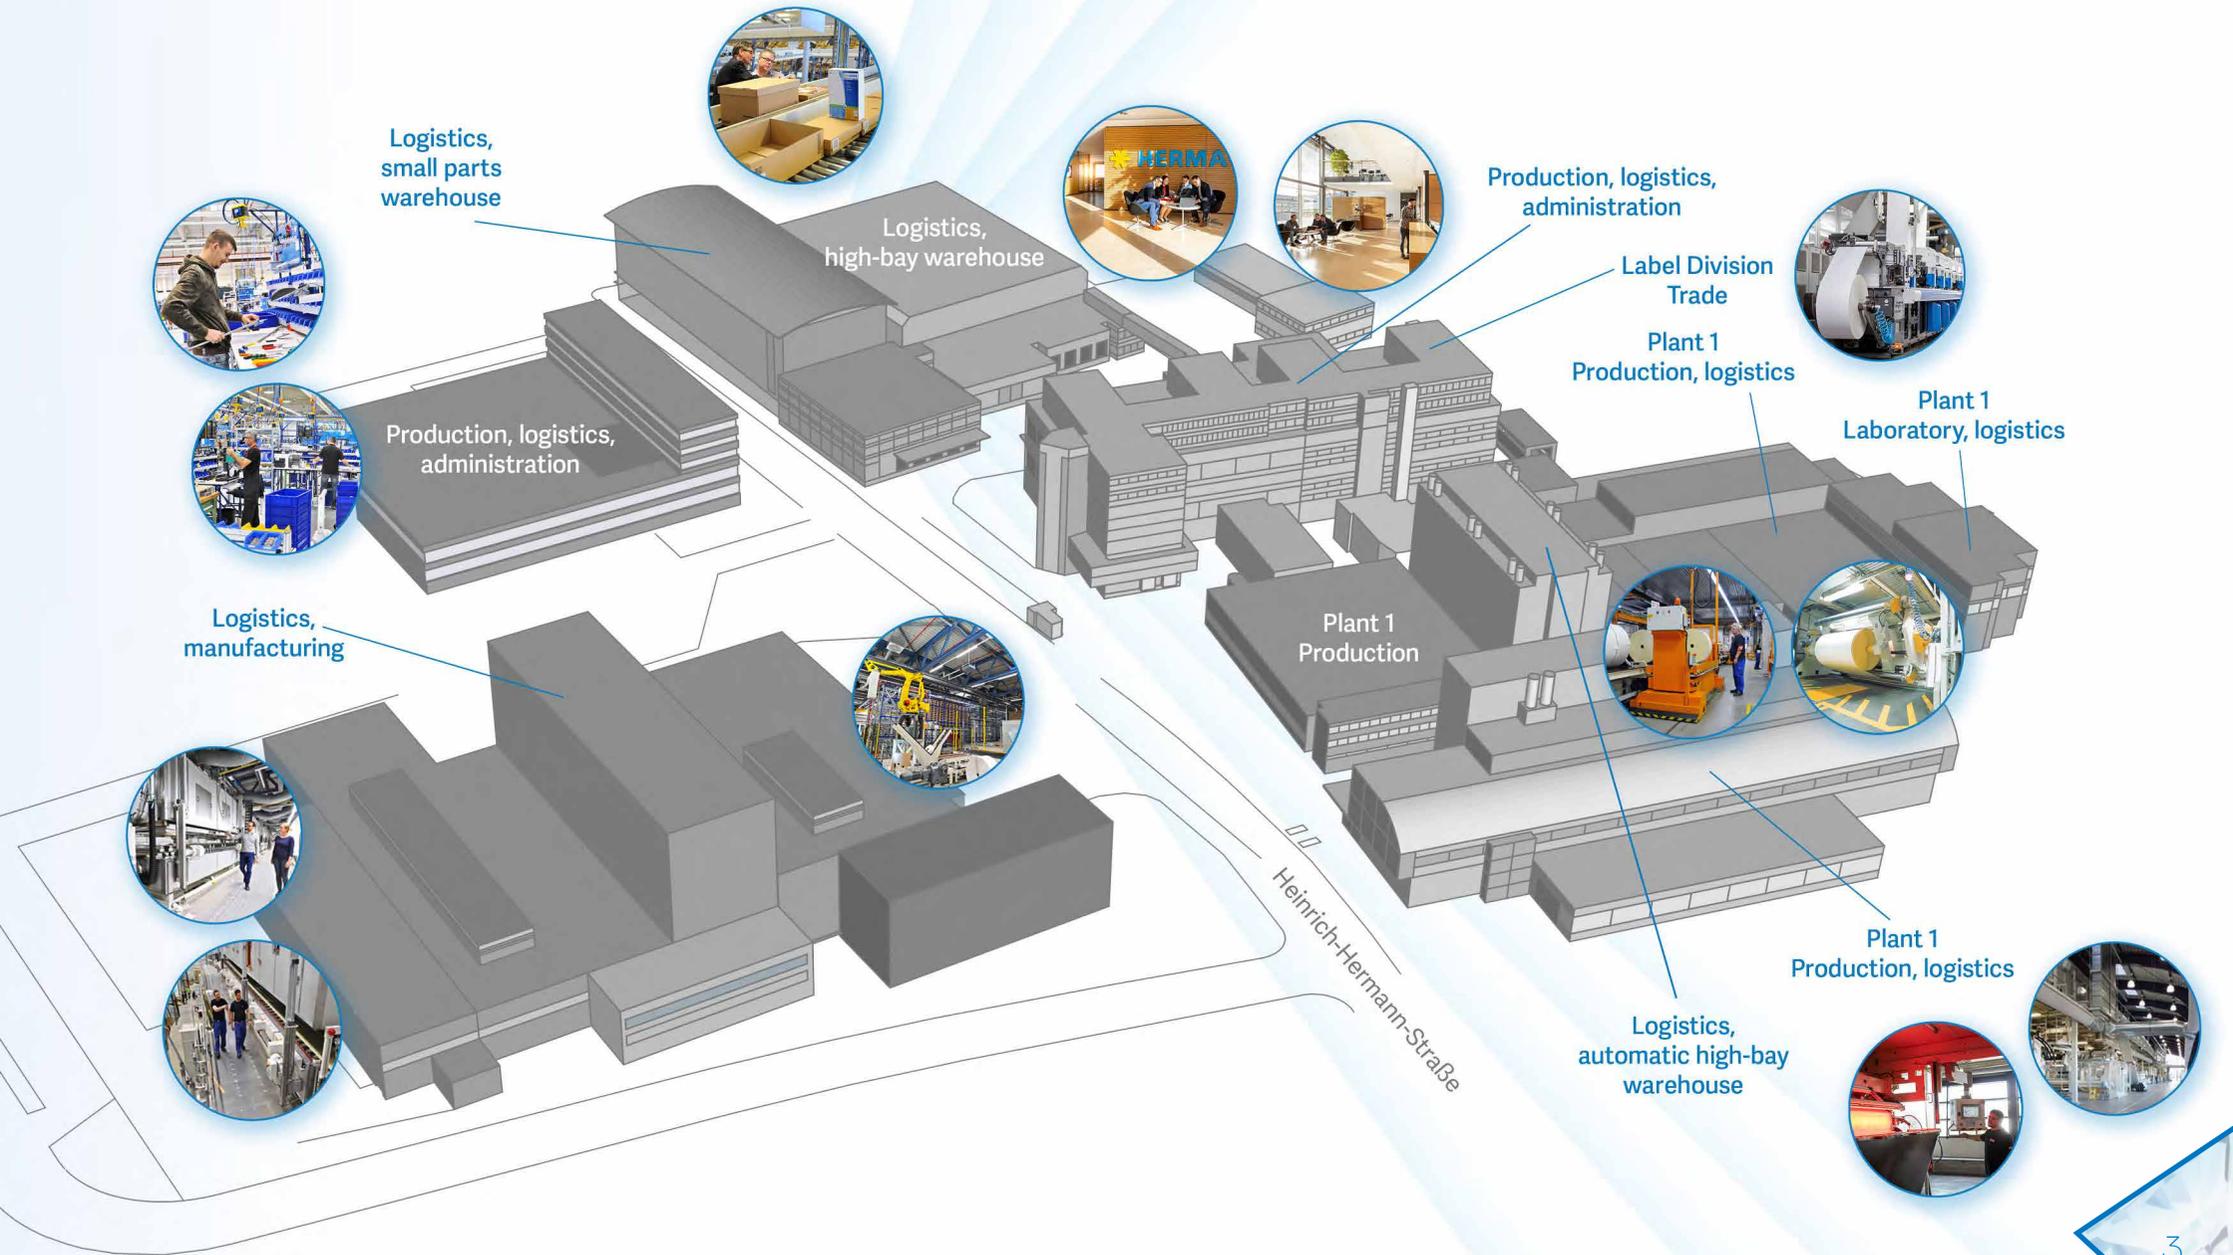

HERMA CAMPUS

With a continuous chain of expertise that is probably unique worldwide, HERMA is able to develop the most suitable solutions for numerous industries and fields of application, from self-adhesive materials to label variants and labelling technology.

Everything from a single source

From development and production to sales and distribution – everything you need in one place.
Our large site in Germany allows us to design the entire production process to be efficient and of high quality.

Made in Filderstadt Germany!

Short distances, state-of-the-art facilities,
from the self-adhesive material to the PREMIUM label

This is how quality is created – from the raw material to the label

The self-adhesive material for HERMA labels is manufactured with the utmost precision on state-of-the-art coating machines – for maximum printing reliability and trouble-free application. The entire production process takes place at one location, from the processing of raw materials to the finished label. Short distances save on transportation and conserve resources. Quality, sustainability and efficiency – Made in Germany.

PREMIUM

Company-owned laboratory

The HERMA laboratory is a crucial part of the company, ensuring both the innovative strength and the reliability and quality of the products.

- **Drive innovation:**
Customized solutions for customer requirements are developed quickly and efficiently.
- **Guaranteeing the highest quality:**
Each batch of labels is tested to ensure that they meet strict standards.
- **Tested and approved:**
PREMIUM A4: TÜV Süd certified, guaranteed jam-free and high-speed capable – no paper jams.
- **Speed and flexibility:**
Customer requests can be quickly implemented and new products brought to market faster.
- **Promoting sustainability:**
Research and testing support HERMA in the development of environmentally friendly products.

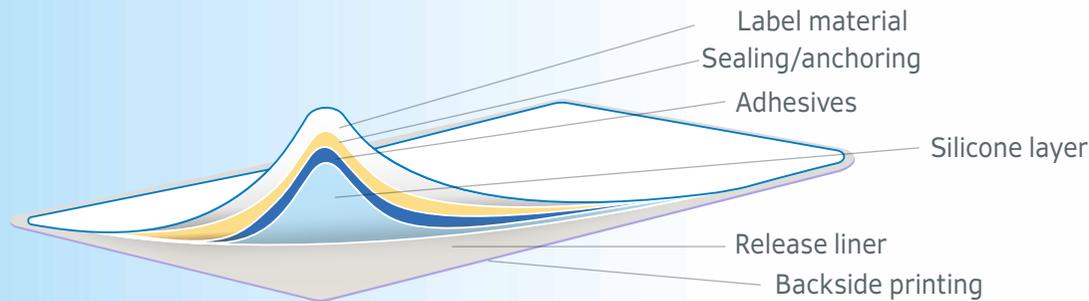

PREMIUM

Material composite

Short distances, state-of-the-art facilities –
from the self-adhesive material to the PREMIUM label

Adhesive materials

are the finished composites of six components.

Label material

High-quality paper with a high degree of whiteness, high opacity and an extra strong material bond are the components for the perfect label.

Adhesives

HERMA has a functional adhesive for every material. PREMIUM labels have a permanent, solvent-free, acrylic-based dispersion adhesive that is free from plasticizers and acids and pH-neutral. In addition, almost all of our standard adhesives are ISEGA-certified for direct contact with food.

Release liner

A white, one-side coated kraft paper is used here: due to its high suppleness and coordinated smoothness on the reverse side, it is very suitable for use in all printers and photocopiers.

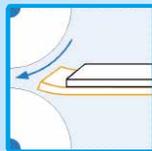

PREMIUM

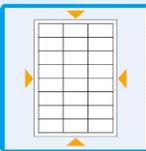

PREMIUM labels from HERMA –

the perfect symbiosis of quality, functionality and sustainability.

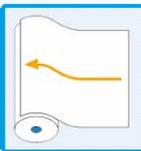

- **Optimized printing and processing properties:**
Jam-free printing: suitable for all common printer types, TÜV Süd certified: guaranteed jam-free and smooth - no paper jams.
- **Extra strong composite material:**
Enables high-speed printing and makes it easier to peel off and stick on the labels.
- **Perfect flatness and all-round protective edge:**
Ensures optimal processing and prevents adhesive from leaking during the printing process.

All-round protective edge, thus no deposits of adhesives

Cleanly trimmed edges all round, preventing paper jams

Optimal flatness thanks to high flexibility

- **Reliable adhesive:**
Excellent bonding properties: both initial and final adhesion are outstanding, even on damp surfaces.
- **Excellent specialty paper:**
Optimum readability thanks to a strong contrast is made possible by labels with a high degree of whiteness of 155 - 160 (CIE) / 175 - 180 (ISO)
- **High opacity:**
The opacity of over 90% ensures a flawless appearance, as show-through is avoided.
- **Wide temperature range:**
The labels can be used at temperatures between -30°C and 80°C and already adhere at -10°C, which emphasizes their versatility.

The mark of responsible forestry

PREMIUM

sustainable labels

Environmentally friendly from the outset, of course

The mark of responsible forestry

HERMA is committed to environmentally friendly labels that meet the highest ecological standards. Since 2012, our self-adhesive labels have been certified according to the strict FSC™ guidelines (FSC™-110972). All raw paper comes from well-managed FSC™-certified forests, recycled materials, and/or other controlled sources. From the selection of certified raw materials to the coating of the self-adhesive material and the production of labels, all production steps are designed with sustainability in mind.

HERMA labels in FSC™ quality are highly versatile:

- On A4 sheets for laser and inkjet printers and photocopiers
- In various formats and pack sizes

These labels not only guarantee quality, but also make a valuable contribution to the conservation of resources – sustainability that impresses.

HERMA greenFact

Consistently among the top 5 percent HERMA sustainability audits by Ecovadis

Ecovadis, one of the world's leading providers of sustainability audits, ranks HERMA 2025 among the top 5% of companies audited in the last 12 months.

PREMIUM

PREMIUM

The HERMA PREMIUM assortment

Maximum choice for every application:

With around 70 different formats, the range offers the perfect solution for every PREMIUM application – precise and versatile.

Packaging units:

The ideal quantity for every need – 10, 25, 100 or 200 sheets per box for selected formats, perfect for smaller or larger projects with big demands.

Individual format selection:

For even more flexibility, selected formats are available with both sharp and rounded corners – for maximum customization.

For every PREMIUM application:

The extensive range covers every PREMIUM requirement and guarantees the highest quality and perfect fit, perfectly tailored to your needs.

Label quality that sets standards – at the best price

High-quality products, an outstanding price-performance ratio and a wide range of products make this offer on the label market unique. HERMA impresses with reliable quality, variety and cost-effectiveness – optimally positioned for every need.

Perfect labels – customized for printing technology and application

Whether you need labels with our without all-round protective edge, with sharp or rounded corners, HERMA labels offer the right solution for every requirement. To ensure a completely professional printing result, it is crucial to choose the right product for the respective printing system. While labels without all-round protective edge are used particularly in professional printing environments and enable a consistent, razor-sharp print image, labels with all-round protective edge are ideal for use in standard office printers. They ensure smooth processing and even color printing.

The application also determines the shape of the corners: labels with rounded corners have a soft, modern look and are particularly resistant to wear – ideal for long-lasting labeling and decorative applications. On the other hand, if you need maximum space for content such as barcodes or addresses, then you should use labels with sharp corners. They provide a clear, business-like look and are perfect for structured labeling in everyday office use.
